

Leveraging four decades of quality craftsmanship, Fenstür Windows and Doors proudly offers Expression Series, our standardized line of wooden windows and doors. This new Canadian made line provides reduced lead times and value-conscious pricing, while still incorporating advanced technology and sustainable processes to deliver architectural-quality windows.

Expression Series Wooden Windows

Using double-pane argon-filled glass, these wooden windows are designed to enhance energy efficiency, contribute to cost savings, minimize environmental impact, and meet or surpass building code regulations.

Why Wood?

The design, construction, and performance of wooden windows and doors have evolved significantly over time, reflecting advances in materials, technology, and building standards.

Warmth & Beauty:

Wood is comfortable, and naturally enhances the interior atmosphere and living space.

Competitively Priced:

Similar in price to vinyl, fiberglass, and aluminum alternatives.

Increased Value:

Wooden windows and doors increase customers' home value and street appeal.

Engineered Wood:

More stable and less prone to warping or splitting than traditional wooden windows.

Advanced Joinery:

Advanced joinery, such as rounded edges and water-proof glues, reduces weathering effects and, therefore, maintenance.

Energy Efficient Double-Glazed Units:

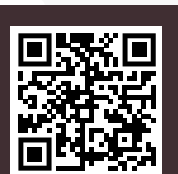

Low-E argon-filled double glazing for enhanced thermal efficiency, contributing to cost savings.

Longevity:

Wood has an estimated service life of at least 3x that of vinyl.

Low Maintenance & Enhanced Durability:

Our wooden windows require less frequent maintenance than traditional wooden windows.

Our windows and doors are locally manufactured in Duncan, BC, using sustainably and ethically harvested wood from Vancouver Island's West Coast. We oversee every step of the process, from selecting and custom milling the logs to shipping the boards to our facility for on-site kiln drying, ensuring they are ready for use in our products.
